DONAULAGER LOGISTICS adds Cool Liner with CELSINEO

DONAULAGER LOGISTICS adds more modern vehicles to its fleet: All new Krone Cool Liners are equipped with the modular CELSINEO cooling unit, a joint development by Liebherr and Krone. The great flexibility and high availability of the refrigeration convinced the international logistics service provider. "The decisive factors are the operability of the units, the continuous assurance of temperatures during transport, and above all the flexibility to be able to provide equipment that meets the highest quality requirements," says Managing Director Gottfried Buchinger, MBA. The topic of service is also of great importance to DONAULAGER LOGISTICS: "This is where CELSINEO speaks for itself, because it is possible to exchange refrigeration modules - quickly and, above all, economically". With over 100 refrigerated trailers in its own fleet, almost 100% of which are Krone Cool Liners, DONAULAGER LOGISTICS is optimally equipped for national and international refrigerated transport. The company always uses the most modern equipment for refrigerated transport. Among other things, the trailers are equipped with GPS tracking systems or temperature telematics for online monitoring of the transport temperature. In total, around 32,000 loads were transported in the areas of refrigerated and curtainsider transport in the past business year. Christian Bozsoki, responsible for international transports at DONAULAGER LOGISTICS, explains: "We were able to implement our existing service contract partners for CELSINEO service, both locally in Linz and in Romania and Greece, where we operate on the long haul". Gottfried Buchinger sums up: "The cooperation between Liebherr and Krone is very professional." More in the video on the CELSINEO YouTube Channel: <link www.youtube.com/channel/UCEA28pQxTm4r6iNh9__yIqA/featured&gt ;https://www.youtube.com/channel/UCEA28pQxTm4r6iNh9__yIqA/featured</link> **About CELSINEO** The Celsineo modular refrigeration unit is a Krone and Liebherr development and features three refrigeration modules. The modules of Celsineo can all be controlled individually. This results in more precise control of the temperature in the loading area. Uninterrupted cooling is ensured by simultaneous cooling and defrosting. The system covers numerous application areas, making the overall trailer system even more versatile. **DONAULAGER LOGISTICS – the logistics centre in the heart of Europe**

© Fahrzeugwerk Bernard KRONE GmbH & Co. KG

DONAULAGER LOGISTICS was founded in 1954 and has been a 100% subsidiary of the LINZ AG Group since 1998. The logistics company focuses on special segments and offers deep-freeze and refrigerated warehouses for foodstuffs, warehouses for pharmaceutical products with temperature monitoring and special warehouses for hazardous goods and water-polluting substances. In the area of transport logistics, DONAULAGER LOGISTICS is on the road with groupage, partial and full loads throughout Europe and with truck-mounted forklifts throughout Austria. In addition to the development and realisation of outsourcing projects in the 4PL (FOURTH PARTY LOGISTICS) and industrial logistics segment, the company offers time-efficient and customer-oriented coordination of value chains. Today, the logistics service provider employs around 150 people. The trimodal location is at the port of Linz, directly on the Danube inland waterway. It has a direct rail connection, three motorway junctions and a container terminal.
