30. April 2025

Expansion of Krone Tyre Range

At transport logistic 2025 in Munich, Krone will unveil its new trailer tyre: the 445/45R19.5 Krone Trusted Prime:Tyre. This highly economical tyre for volume semitrailers, which will be showcased at stand 201/302 in Hall A6, has been specifically developed for high-volume transport in long-haul and regional operations. The developers placed particular emphasis on achieving the optimal balance between low rolling resistance and long service life, resulting in high mileage, fuel savings, and reduced CO₂ emissions.

The Krone Trusted Prime:Tyre features an extra-wide 453 mm tread for outstanding stability. Wide, 14 mm deep grooves ensure optimal traction on wet roads and even pressure distribution. The 3PMSF symbol confirms the tyre's suitability for winter use. With a load index of 164, the mega trailer tyre is designed to carry 5 tonnes per tyre, equating to 10 tonnes per axle. The new tyre for mega trailers weighs 68 kg.

The Krone Trusted Tyre range has now been expanded with this new addition. The programme now covers all label classes from A to C: Krone Eco:Tyre (Label A), Krone Prime:Tyre (Label B), available from summer 2025, and Krone Comfort:Tyre (Label C). The tyre range is further complemented by the retreaded Krone R:Tyre. All Krone tyres are also available in the Krone Trailer Parts online shop at www.krone-trailerparts.com under the "Tyres" category.
