KRONE Trailer at Solutrans 2025

KRONE Trailer will be presenting itself as a partner for modern transport solutions at Solutrans 2025 in Lyon from 18 to 22 November 2025 in Hall 4, Stand C085. This year's presence at the exhibition will focus on a stand that invites dialogue and two exhibits that impressively demonstrate KRONE's expertise in the field of superstructures and equipment: the Profi Liner and the Dry Liner.

The Dry Liner with plywood side walls showcases practical equipment elements that are perfectly tailored to the requirements of the French market. These include a roller door with a clear width of 2,370 mm, which enables fast and convenient loading and unloading. The equipment is complemented by an LED light strip in the cargo area, premium sight sealing and tear plate inserts in the floor for additional stability in the rear area. Other practical details include 13 pairs of lashing rings embedded in the floor and two rows of slotted lashing rails.

In addition to the Dry Liner, the proven Profi Liner will also be on display at the stand – a classic in European long-distance transport that impresses with its high functionality, robustness and practical detail solutions. Both vehicles reflect KRONE's consistent customer focus and market orientation.

But KRONE is not only showcasing vehicles in Lyon, but also its service expertise and digitalization: visitors can find out about the mykrone.blue digital ecosystem and the KRONE Trusted Tyre range. ‘Our stand at Solutrans is intended to be more than just a product exhibition – it is an invitation to exchange ideas. We look forward to talking to our customers and partners in a relaxed environment about our vehicles, current challenges and solutions in the world of transport,’ says Simon Richenhagen, Head of Marketing at KRONE Trailer.
