New from Krone: Krone Trusted

Tested brand-name spare parts from the market leader

Werlte, January 25, 2021 – Every freight forwarder is familiar with the following situation: When a part needs to be replaced on a trailer that is already a little older, they often consider whether it is still worthwhile to install an expensive original spare part. Krone now offers an interesting alternative with the new spare parts brand Krone Trusted.

The advantage for the customer: From now on, Krone Trusted offers tested brand-name spare parts throughout Europe that can be up to 50 percent cheaper than the original spare part. The assortment, which Krone will continuously expand, currently ranges from ABS sensors to brake drums and air suspension hoses to disc brake pads and also includes axle types such as BPW, Jost, Sauer and Schmitz Cargobull. Of course, Krone Trusted offers a twelve-month warranty on all spare parts.

With the new Krone Trusted offer, spare parts costs can be significantly reduced, which has a lasting positive effect on the profitability of the transport company. Krone Trusted is not only available for Krone vehicles. Further information and an overview of currently available Krone Trusted offers are available online here: www.krone-trailerparts.com/trusted
