Profi Liner meets Comfort Tarpaulin

In day-to-day transport operations, what matters most is that processes simply work. Loading bays are narrow, ramp times are tight and every move must be spot on. This is precisely where the Profi Liner Comfort comes into its own. It offers the robust foundation of the classic Profi Liner and complements it with a tarpaulin system designed for fast, ergonomic operation.

The Profi Liner has been regarded for years as one of the most versatile and tried-and-tested tarpaulin semi-trailers on the market. Its robust chassis construction, high suitability for everyday use and flexibility make it a reliable partner for a wide variety of transport tasks. With the Profi Liner Comfort, Krone is expanding this concept to include numerous comfort features.

The Comfort tarpaulin, familiar from the Mega Liner Comfort, can be opened and closed particularly quickly. “We’re talking about time savings of up to 80–90 per cent during operation, as well as an opening and closing time of around 30–45 seconds,” explains Michael Lehmann, Product Manager at KRONE Trailer.

With the Profi Liner Comfort, KRONE brings together what matters most in the day-to-day operations of many fleets: a tried-and-tested, universally applicable vehicle concept and a tarpaulin that noticeably reduces the workload for drivers. The result is a semi-trailer that consistently combines robustness with ease of use.

The commercial vehicle manufacturer also remains true to the Profi Liner’s standards when it comes to load securing. The Comfort solution is designed for fast loading processes whilst also supporting safe transport operations. The Profi Liner Comfort’s concept includes, amongst other things, certifications in accordance with EN 12642 Code XL, Daimler 9.5 and VDI 2700 Sheet 12 (Beverages).

Visitors can experience the vehicle in the outdoor exhibition area at IAA Transportation 2026 and see
