eTrailer from KRONE and Trailer Dynamics

24. October 2023

Solutrans 2023 in Lyon

KRONE presents latest innovations

Solutrans 2023, one of the leading international trade fairs for commercial vehicles, will soon open its doors in Lyon. Among the many expected exhibitors, the renowned commercial vehicle manufacturer KRONE will also present its latest innovations to the trade public.

The focus of the KRONE presentation is the eTrailer. This revolutionary model was developed in close cooperation with technology innovator Trailer Dynamics. Equipped with a powerful electrified axle, the eTrailer stands out from the competition. The eAxle not only supports the drive of the tractor unit, but also recovers braking energy through recuperation. This enables the eTrailer to provide impressive drive assistance and thus reduce the consumption of the diesel truck on long journeys. In combination with a battery-electric tractor unit, the range of the entire system is doubled or even tripled.

One of the most significant features is its flexibility: the eTrailer can be combined with any conventional truck. Fleet operators can thus benefit directly from the technology and realise a significant CO2 reduction in their operations. This ecological advantage is further enhanced by the integrated digital technology of the intelligent control system as well as the functionally safe processes in the eTrailer's driveline.

"With the eTrailer, we are not only setting a milestone in technology, but are also actively shaping the future of sustainable freight transport," says Vera Hunfeld, Managing Director KRONE France.

Visitors to Solutrans 2023 in Lyon will have the opportunity to experience this innovative technology first-hand and learn about the numerous advantages and features of the eTrailer.

Further highlights from KRONE

In addition to the eTrailer, KRONE is also bringing its 360-degree service package to Lyon. A special highlight of this division is the "KRONE Trusted Tyre Comfort" (KT231) tyre generation, which will be launched in summer 2023. But that is only a fraction of what KRONE Trusted has to offer. The comprehensive spare parts brand provides an impressive range: More than 80 percent of the common wear parts for trailers are available here. What is special is the unbeatable price-performance ratio. Customers benefit from quality products that are up to 50 percent cheaper than the corresponding original spare part. The versatile assortment ranges from axle parts and ABS sensors to brake drums, air spring pads and disc brake pads. Another plus point: all individual parts come directly from renowned European manufacturers that KRONE also trusts as suppliers for original equipment.
