Two Hundred and Fifty Vehicles Roll with Heavy Goods

Gypsum boards and cobblestones require robust vehicles

As Regional Sales Manager in his area, Markus Gemmel supervises the federal states of Rhineland-Palatinate and Saarland. His customer, L.T.G., is a Langenlonsheim-based company that specialises in heavy goods. While delivering an additional two hundred and fifty Krone semitrailers and trailers, Markus Gemmel, as a gesture of thanks, presented a semitrailer model to Manfred Graffe, the Managing Partner of Langenlonsheimer Transport GmbH (L.T.G.). The companies share a long-standing and friendly working relationship: L.T.G.'s fleet includes over 3,000 vehicles including sprinters, tippers for bulk materials, box trucks, semitrailer tractors, construction material cranes, and tower cranes up to 36 m in height. Both Krone and L.T.G. are customer-focused and widely-known in the industry.
