## tyre range at NUFAM 2025

KRONE will be presenting its new range of tyres at NUFAM 2025 in Karlsruhe. This includes the 445/45R19.5 KRONE Trusted Prime:Tyre trailer tyre – a highly economical special tyre for volume semitrailers in long-haul and regional operations – and the KRONE Trusted Eco:Tyre for maximum efficiency on every kilometre. The new tyres will be on display at the KRONE stand C109 in Hall 1.

Awarded efficiency class A, the Eco:Tyre ensures particularly low fuel consumption and high mileage – reducing operating costs and increasing profitability. The robust shoulder construction guarantees even wear, while the special tread pattern optimally dissipates heat, extending the tyre's service life. The anti-wear layer also ensures strong performance and noticeably improves driving stability.

And since this summer, the KRONE Trusted Prime:Tyre has been impressing with its optimal combination of low rolling resistance and long mileage – for lower fuel consumption and reduced CO<sub>2</sub> emissions. With a width of 453 mm, the extra-wide tread ensures excellent stability. The 14 mm deep, wide grooves enable optimum traction in wet conditions and even pressure distribution. The 3PMSF symbol also confirms the tyre's suitability for winter use.

With a load index of 164, the megatrailer tyre is designed for a load capacity of 5 tonnes per tyre or 10 tonnes per axle. The new tyre weighs 68 kg.

The two new additions complement the existing KRONE Trusted Tyre programme, which now covers all label classes:

- **KRONE Eco:Tyre** (Label A)
- **KRONE Prime:Tyre** (Label B)
- **KRONE Comfort:Tyre** (Label C)

The range is complemented by the retreaded KRONE R:Tyre. All tyres are available from the KRONE Trailer Parts online shop at [www.krone-trailerparts.com](http://www.krone-trailerparts.com) in the 'Tyres' category.
